THE WORLD OF GRINDING

EVERYTHING FROM ONE SOURCE

INTERNAL GRINDING

- Machining of a wide variety of workpieces, both cylindrical as well as end faces, tapered and spherical parts
- Spindles with highest speeds for high cutting speedsSpindles for sophisticated deep-hole grinding

- Highest running smoothness and precision
 Universally loadable bearings for radial, axial and combined grinding forces

EXTERNAL GRINDING

- High torque and high power density due to high-pole Sychronous motors
- HSG grinding with peripheral speeds up to 140 m/s
- Robust and high-precision bearing systems

GRINDING OF TOOLS

- Compact, high-torque and high-performance spindle systems for the production of cutting tools
- Razor-sharp cuts thanks to high rigidity and robust bearings
- Minimal axial shaft displacement
- Automatic tool clamping system or double-sided tool interface

DRESSING AND PROFILING OF GRINDING WHEELS

- Compact and powerful spindles with high thermal stability for precise dressing and profiling
- Cylindrical spindle housing or direct mounting housing

MACHINING OF SPECTACLE/FINE OPTICS

- Milling, grinding, polishing and dressing in the spectacle and fine optics industry
- Production of high-precision spheres, aspheres and fine optics at up to 100'000 rpm
- Sophisticated spindle sealing for the high demands of the optical industry
- Tool interface on both sides for pre-machining and finishing with one spindle

ACCESSORIES

Suitable accessories such as grinding mandrels, chucks with collets and belt pulleys can be found at www.fischerspindle.com/accessories

HF MOTOR SPINDLES FOR UNIVERSAL GRINDING

HIGHEST PERFORMANCE IN A COMPACT DESIGN

- Compact, robust design
- •
- High power and high torque over a wide speed range Excellent rigidity and concentricity for highest dimensional and form tolerances Designed for high radial and axial loads •
- •
- Sealing system supported by sealing air

SPINDLES FOR DEEP HOLE GRINDING

UP TO A DIAMETER-LENGTH RATIO OF 1:20

Deep-hole grinding is the top discipline in internal cylindrical grinding. In recent years, it has become an increasingly important component in the manufacturing spectrum of the aerospace industry. Compared to classical internal cylindrical grinding with a diameter-to-length ratio of up to 1:10, with the FISCHER deep-hole spindles can machine workpieces up to 1:20.

This is achieved, among other things, with the proven FISCHER coupling shaft principle, which delivers an unsurpassed grinding quality in deep bores.

- Highest speeds
- Optimum rigidity ٠

- Optimum righty
 The bearing-shaft system is statically determinant
 Precision grinding spindles for belt drive or with motor and external taper for internal grinding of deep bores
 Cylindrical or stepped spindle housing
 High precision spindle bearings with lifetime grease lubrication
- Labyrinth or sealing air system

SPINDLES FOR INTERNAL GRINDING

FOR BELT DRIVE OR MOUNTED MOTOR

These precision spindles have been developed for radial and axial loads and have a high-precision spindle bearing with lifetime grease lubrication.

UJ series with belt drive

- Standard spindle housing Ø40 to 80 mm
 Speeds up to 28'000 min-1
- UJD tool interface ٠
- Direction of rotation right ٠
- Labyrinth sealing system •

SPINDLES FOR EXTERNAL GRINDING

CUSTOMISED OR STANDARD SERIES

High precision and smooth running, a long service life and easy maintenance and care are the hallmarks of high-quality FISCHER external grinding spindles. Only with these spindles can machines achieve very good cutting performance and the best surface qualities.

- Customized solutions according to the machine manufacturer's specifications •
- Motor spindles or externally driven spindles ٠
- With one-sided or two-sided tool interface, depending on customer requirements ٠
- Integrated, automatic balancing systems as an option ٠
- Cylindrical spindle housing or direct mounting housing ٠
- Asynchronous and synchronous motors •
- Rotary encoders as an option ٠
- Robust, high-precision bearing systems ٠
- HSG grinding with circumferential speeds of up to 140 m/s ٠

M32/34 series with attached motor

- Standard spindle housing Ø60 to 100 mm
- Speeds up to 6'000 min-1 •
- External taper as tool interface ٠
- Direction of rotation right ٠
- Labyrinth sealing system

SPINDLES FOR DRESSING AND PROFILING

COMPACT AND POWERFUL

AES series

Robust motorized dressing spindle with stable bearing for profiling and dressing of CBN and other grinding wheels.

- Highest concentricity and rigidity for precise dressing
- Thermal stability •
- Asynchronous motor •
- Robust, high-precision bearing system ٠
- Permanent grease lubrication
- Labyrinth sealing, supported by sealing air ٠

FD series

Dressing and profiling of grinding wheels by means of powerful motor spindles with robust bearings.

- Highest concentricity and rigidity for precise dressingThermal stability
- Synchronous motor for high motor power
- Robust, high-precision bearing system
- Permanent grease lubrication
- Labyrinth sealing, supported by sealing air

SPINDLES FOR TOOL GRINDING

HIGH PERFORMANCE IN A COMPACT DESIGN

This is what distinguishes our high-quality FI-SCHER grinding spindles:

- Compact designs ٠
- High-torque and high-performance motors •
- High precision thanks to high rigidity •
- Robust bearings and minimal axial shaft misalignment •
- A long service life ٠
- Developed according to the machine manufacturer's specifications ٠

This is the only way for machines to achieve a very good cutting performance and the best surface quality of the tools to be machined.

Saw blade grinding

Compact design

with face contact

motors

system

Asynchronous and synchronous

Direct mounting housing

Speeds up to 60'000 min-1

Robust, high-precision bearing

Manual tool interface - cylinder

Resolver/rotary pulse encoder

Acoustic emission detection

•

•

•

•

•

•

•

Tool grinding

- Compact design •
- Asynchronous and synchronous • motors
- Slide-in and direct mounting • housings
- Speeds: 12'000 / 24'000 min-1 •
- Robust, high-precision bearing ٠ system
- Automatic tool clamping system ٠ HSK-E50/F63 or double-sided tool interface
- Pneumatic and hydraulic release ٠ units
- Rotary pulse encoder .
- Belt solutions with center drive

Broaching tool grinding

- Compact design •
- Asynchronous and synchronous • motors
- Direct mounting housing and • cylindrical spindle housing
- Speeds up to 24'000 min-1
- Robust, high-precision bearing • system
- Manual tool interface HSK and external taper
- Rotary encoder

SPINDLES FOR GRINDING AND POLISHING OF OPTICS AND GLASS SPECIAL SOLUTIONS FOR DEMANDING MACHINING PROCESSES

The very high and special requirements of the optical industry demand a high degree of technological competence and many years of experience competence and many years of experience - with over 80 years of experience, FISCHER is your best partner.

Customized solutions according to the machine manufacturer's specifications.

- Machines for spectacle and precision optics
- Flat glass edge grinding machines ٠
- Crystal glass decor grinding machines
- Corrosion-resistant design •
- Highest concentricity and rigidity for precise polishing and grinding ٠
- Housing shape and tool interface according to customer requirements ٠
- Motor and externally driven precision spindles •

PERIPHERALS

Oil-air central lubrication unit

Pre-assembled central lubrication unit on aluminium base plate with the following components:

- Lubrication pump with level control
- Main shut-off valve
- Ultra-fine filter for oil
- · Air treatment for central lubrication unit and sealing air

| MAIN TYPES* | ARTICLE NO. |
|---------------|-------------|
| OLA 106212110 | 147889 |

Frequency converter

support you in choosing the suitable supplier.

Filter choke

When using pulse width modulating (PWM) frequency inverters in the low-cost price segment, the interposition of a motor choke is mandatory. The FISCHER test center supports you in the design of the motor choke.

FISCHER test bench.

Oil-air dosing unit

- Used for oil metering in spindles with oil-air bearing type
- 100 % tested and certified
- Compatible with current competitor product

| ТҮРЕ | SPECIFICATION | ARTICLE NO. |
|--------|---------------------------------------|-------------|
| SFJ 4G | 4 injectors, 0.01cm ³ each | 104235 |

Exhaust air filter

- For collecting waste oil coming out of spindle oil return path
- · Dampens the air noise of the lubrication system

| DESIGNATION EXHAUST AIR FILTER | SPINDLE SIZE | ARTICLE NO. |
|---|--|----------------------------|
| ALF 310 for 1 oil return line ALF 310 for 2 oil return lines ALF 310 for 3 oil return lines | Suitable up to spindle-diameter 210 mm | 107061 106807 107057 |
| ALF 510 for 1 oil return line ALF 510 for 2 oil return lines ALF 510 for 3 oil return lines | Suitable from spindle-diameter 230 mm | 108107 108106 108108 |

Operating fluids

| ТҮРЕ | SPECIFICATION | CONTENTS | ARTICLE NO. |

Accessories Our accessories can be found on our website at: www.fischerspindle.com/accessories

The correct design of the converter is decisive for the smooth running, power develop-ment and heat generation of your spindle unit. FISCHER has been working closely with the leading converter manufacturers for years and regularly exchanges experience. As a result, we offer you optimum conditions when defining the inverter and are happy to

The ideal frequency inverter/choke combination results in less heat loss in the rotor and stator and higher power output. Results were measured and documented on the

SERVICE AND REPAIRS

THE RIGHT OFFER FOR EVERY NEED

SERVICE AND SUPPORT

- On-site support: Support for commissioning of spindle systems
- Maintenance training and application consulting ٠
- Service visits for minor repairs or optimizations ٠
- On-site vibration and bearing analysis •
- Trainings •

REPAIRS OF FISCHER SPINDLES AND MILLING HEADS

- FISCHER Spindle Group has service centers and production facilities around the world
- Repair FISCHER spindles with original parts; • refurbish key components as needed; bring spindle to like new condition.
- Express repairs ٠
- Repair of FISCHER milling heads ٠

THIRD PARTY SPINDLE REPAIRS

- We repair all brands of spindles in our worldwi-٠ de group companies
- Analysis, repairs and retrofits of all your spindles •
- FISCHER quality, service and advice ٠
- All from one source •

SERVICES

Spindle hotel

Your spindle is stored at FISCHER and checked for proper function at regular intervals. The warranty begins with the call-off and delivery of the spindle.

Spindle pool for machine manufacturers

While your spindle is being repaired, you can benefit from one of our pool spindles. You can continue adding value without interruption and keep production going.

Exchange spindles for end customers

We offer exchange spindles available in short notice with your defective spindle. This depends on the spindle type and availability.

Spindle repair service

We offer a professional and binding repair service. On request we provide a detailed analysis of the defective spindle as well as individual quotations.

Spindle Taxi

Your spindle will be picked up free of charge in Europe.

Spindle periphery

We support you in the selection and design of the appropriate periphery for a safe operation of the spindle.

The FISCHER family is present at five locations worldwide and employs over 400 people. A strong global team with the greatest enthusiasm for technology, ensuring customer satisfaction through successful, innovative products and outstanding service.
